Internship and Fellowship Opportunities
• Princeton in Asia
• International Internship Program (OIP)

6 levels of instruction
14 courses within the curriculum
5 full-time instructors

Updated August 30, 2023
The Korean Language Program offers up to six levels of language study, emphasizing skills in cross-cultural communication and promoting a highly interactive learning environment. Through various extracurricular activities, such as the Virtual Reality lab, students have the opportunity to build cultural competency through cultural immersion. The Korean Terrace program also connects Princeton students with language partners from Korean universities via Zoom. Our small class sizes and regular program events foster a special sense of belonging to a community of learners who share the same goal of becoming proficient in Korean language.

PRINCETON IN KOREA
PIK is an intensive study abroad program offering intermediate Korean language courses taught by Princeton University and Korean Language Institute instructors at the prestigious Yonsei University in Seoul, South Korea. PIK’s eight-week total immersion experience is an excellent opportunity for participants to enhance their Korean language skills and gain a deeper understanding of Korean culture. Participants who successfully complete the program receive Princeton credit for the equivalent of one year of Korean language study (KOR 105/107). Internship opportunities on Yonsei campus are also available during program, providing participants a unique opportunity to experience South Korean work culture firsthand, while practicing and improving their cross-cultural communication skills. Generous need and merit-based financial aid are offered to interested parties who qualify through the Office of the Dean of the College and the Program in East Asian Studies.
